Art Unit: 1724

The disclosure is objected to because of the following informalities: In the specification on page 5 lines 28 and 29 "This object...20." should be deleted.

Appropriate correction is required.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1-9 "in particular", "treated", "particularly preferred", and "preferably" are vague and indefinite because it is unclear how these terms further limit the claims. In claim 1 "the noble metal surface" lacks clear antecedent basis.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Goetz 2,344,548.

It is submitted that Goetz appear to disclose (see pages 4-6 and Fig. 3) the process steps recited in the instant claims. With regard to claim 8, it is submitted that the treatment of water in sterilizing vessel 29 would appear to quench the base material.

Applicant's election of Group I claims 1-9, in the reply filed on 11/22/06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). The restriction requirement is made final.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
